RE:  
Jacquelyn Mahoney  
Bradston Street  
Boston MA 02118  
[REDACTED]

To Whom It May Concern,

This letter is to confirm that Jacquelyn Mahoney is a patient of the McInnis Health Group in Boston, MA and is currently engaged with providers in our OBAT program. We will continue to support Jacquelyn Mahoney for continuation of this treatment plan.

This patient was seen today at our 780 Albany Street Clinic for medical care.

**The medication dosing is as follows:** 24 mg buprenorphine-naloxone daily

This may be taken on a schedule of the patient's choosing, as long as the full day's amount is taken each day, and as long as the schedule is more or less consistent from day to day. For example, the whole day's dose may be taken in the morning, or can be split into morning and evening doses, and so on, as long as it is similar each day.

We will continue to prescribe this medication while this patient is in residential treatment, if needed, and after discharge. We do not provide 30 day supplies of controlled substances, but we can fax refills to a pharmacy convenient for the residential program. To arrange this or for other care coordination, **page me at 781-221-6565 or leave a message on my confidential voice mail at 617-447-0955.** You may also reach out to our case manager, Mansi Shah, to help coordinate care; her number is 857-654-1628.

Please do not hesitate to get in touch with any questions or concerns, and please do reach out prior to discharge to help us coordinate care after discharge. Thank you for your care of this cherished patient of ours.

Sincerely,

Charina Hanley, RN

OBAT Team
